

EVBC Newsletter

Issue May 2017

Events

There are some events which could be of interest for you:

- ❑ **Tutorial: Production Pipelines for Virus Sequencing Data**,
2th - 15th September 2017, Basel, Switzerland.
This would be of interest to researchers who analyze virus sequencing data either in basic research or clinical settings. Also, It is of particular interest to staff of bioinformatics core units and to developers (see <https://bc2.ch/2017/program/tutorials/t3/>)
- ❑ **Course: Viral Bioinformatics and Genomics**,
7th – 11th August 2017, Glasgow, Scotland.
It aims to address bioinformatic challenges with a focus on viral data sets and analyses and encourage the exchange of ideas among diagnosticians, virologists, bioinformaticians and evolutionary biologists (see <http://www.bioinformatics.cvr.ac.uk/course.php>)
- ❑ **Workshop: Bioinformatics Workshop on Virus Evolution and Molecular Epidemiology**,
27th August 27th - 1st September, 2017, Lisboa, Portugal.
(see <https://rega.kuleuven.be/cev/veme-workshop/2017>)

Website

We have included in our webpage a list of bioinformatical tools and databases that could be of interest for you. We would be happy to link your tools as well. That can be for beta-testing, while submitting or after publication.

For details, please have a look to our webpage: <http://evbc.uni-jena.de/tools/>

Affiliation for publication

It would be appreciated if all members use the center as an additional affiliation for their future publications to promote the center even more.

EVBC affiliation is: **European Virus Bioinformatics Center, Leutragraben 1, 07743 Jena.**

Summer/winter School

We plan to organize a multidisciplinary training school late 2017 or at the beginning of 2018.

Announcements

HONOURS is a Marie Skłodowska-Curie Action has announced 15 positions for Early Stage Researchers (ESR) at the interface of veterinary and human health, virology, biostatistics, and pathogen discovery (see <https://www.honours.eu/vacancies/general-information>).

Publications

Please let us know about publications, which might be of interest for EVBC members. The first manuscript with respect to the center has been submitted (a copy is attached).
