

Upcoming Events

*EVBC does not endorse any of the listings and is only involved in events marked as EVBC Events.

29th Annual Meeting of the Society for Virology

20–23 March 2019 in Düsseldorf, Germany

The annual meeting of the society covers a broad spectrum of topics in basic and clinical virology and attracts young scientists as well as experienced virologists. Keynote lectures by internationally recognized experts in viral immunology, molecular and clinical virology will complement the regular scientific workshops and poster sessions.

Abstract submission deadline: **04 January 2019**

7th Meeting of The European Society for Virology — European Congress of Virology 2019

28 April–1 May 2019 in Rotterdam, Netherlands

It is the ambition of the ESV to create a program with tracks in which basic, clinical, and diagnostic virologists feel at home, as these typically have separate conferences although the interaction is crucial to advance knowledge in each field.

Abstract submission deadline: **01 January 2019**

Molecular & Computational Biology Symposium 2018

29–30 November 2018, in Dublin, Ireland

The symposium is organised by PhD students from the Bioinformatics and Systems Biology and Computational Infection Biology programs. The event will showcase the local research at UCD and in Dublin to Irish and international academic researchers.

Registration deadline: **16 November 2018**

Recent Selected Publications by EVBC Members

VIRULIGN: fast codon-correct alignment and annotation of viral genomes. *Bioinformatics*. [10.1093/bioinformatics/bty851](https://doi.org/10.1093/bioinformatics/bty851)

A planarian nidovirus expands the limits of RNA genome size. *PLoS Pathog*. [10.1371/journal.ppat.1007314](https://doi.org/10.1371/journal.ppat.1007314)

Viruses.STRING: A Virus-Host Protein-Protein Interaction Database. *Viruses*. [10.3390/v10100519](https://doi.org/10.3390/v10100519)

Virus detection in high-throughput sequencing data without a reference genome of the host. *Infect Genet Evol*. [10.1016/j.meegid.2018.09.026](https://doi.org/10.1016/j.meegid.2018.09.026)

LiveKraken—real-time metagenomic classification of illumina data. *Bioinformatics*. [10.1093/bioinformatics/bty433](https://doi.org/10.1093/bioinformatics/bty433)

Generation of therapeutic antisera for emerging viral infections. *NPJ Vaccines*. [10.1038/s41541-018-0082-4](https://doi.org/10.1038/s41541-018-0082-4)

Increasing the number of available ranks in virus taxonomy from five to ten and adopting the Baltimore classes as taxa at the basal rank. *Arch Virol*. [10.1007/s00705-018-3915-6](https://doi.org/10.1007/s00705-018-3915-6)

3rd Annual EVBC Meeting

Don't forget to register for our 3rd Annual EVBC Meeting! [Registration](#) >

Accommodation: To help you find an accommodation during our Annual Meeting, we (in cooperation with TCH) could reserve rooms in several hotels with different price categories. Please note, that there is another conference in Glasgow during that time. [Online booking tool](#) >

Special Issue on Virus Bioinformatics: We are still looking for interesting papers for our special issue. Original research articles as well as review papers are welcome. EVBC members are offered **15% discount of the article processing charges**. Deadline for submission of full-papers is on **01 February 2019**. [More](#) >

Sponsorship: We are still looking for sponsors. Please forward our invitation to suitable companies [More](#) >

Vacancies

University of Glasgow Centre for Virus Research: The CVR currently has an exciting vacancy for a fixed term (3 years) MRC Clinical Research Fellow with the aim to develop a project in clinical and translational virology research at CVR. Application deadline: **26 November 2018**. [More](#) >
